

# DREAM MACHINE

BY RIA NIJJAR

## Business PC Corporate Use

- Used for corporate affairs which include searching the web, spreadsheets, word and calling
- Corporate businesses include a team effort so communicating with your team via email tends to be very important
- They need lots of storage for saving documents
- A general statement of the PC is it has a high speed CPU chip, large RAM memory, high speed graphics card, medium sound card, basic motherboard, HDD, removable media, network interface

## WOULD BE NICE FEATURES

- Top 3 priorities would be a high speed RAM memory, high speed CPU processing chip and graphics card
- The components at the bottom of my list include sound card and removable media
- I would not spend extra money on them because sound is not needed as much in a business setting
- Removable media such as DVD, USB and Flash are not top priorities. You can store information in the PC, DVD is not needed at work for flash you can find an alternative as well.

## DREAM MACHINE

BUDGET = \$2000

PC:

9th Gen Intel® Core™ i7-9700 (8-Core, 12MB Cache, up to 4.7GHz with Intel® Turbo Boost Technology)

\$899.00

Dell 22 Monitor | P2219H

\$192.99

Keyboard and Mouse Combo | KM636

\$39.99

I got all my needed parts in this budget and i got all the upgrades i needed such as more storage in RAM Memory.

## BUDGET MACHINE

BUDGET = \$800

Mini PC

Model#: PN40-BB021M  
\$196.99

LED Monitor

Model#: 60FBHAR1US  
\$240.99

Keyboard

Model#: PZ3-00002  
\$24.99

Mouse

Model#: STM042W  
\$96.99

Some components I left out were a better PC. Corporate companies do require a CPU that is above the budget.
